

MiniFlex[®] Cleaner

Portable Vortex pushjet

The MiniFlex cleaner is a portable push-jetting system for cleaning drains and removing stoppages from 32 – 100mm (1-1/4" to 4") pipes. The patented nozzle generates a powerful 120bar (1750psi) vortex while the Grease Release additive encapsulates fats, oils and greases to remove blockages, delays future build-ups and prevent settlement further down the line.
